Education

Savitribai Phule Pune University — Pune, Maharashtra
Bachelor of Technology in Computer Science and Engineering — *May 2027*

Experience

Software Development Intern — Nov 2026 – Present
ThinkBuild — *Hybrid — Nashik, India*

- Contribute to full-stack web application development using the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- Develop responsive and reusable user interface components using React.js, JavaScript, HTML5, and CSS3.
- Prepare and maintain client project documentation, including project requirements, website content, functional specifications, and business needs.
- Conduct competitor website research and benchmarking to analyze UI/UX, website layouts, navigation, content structure, and functionality, identifying opportunities for improvement.
- Translate client requirements and competitor research findings into actionable recommendations for website design, content presentation, and feature enhancements.
- Use Git and GitHub for version control, code management, and collaboration throughout the software development process.

Projects

Self-Healing Cloud Cluster | *React.js, Node.js, FastAPI, Docker, Kubernetes, GitHub Actions* — 2026 – Present

- Developing a responsive web dashboard to visualize cloud cluster status, anomaly detection results, and system recovery activities.
- Building interactive UI components and integrating frontend functionality with backend services through RESTful APIs.
- Integrating Machine Learning APIs to display anomaly detection results and implementing simulation and reset functionalities to demonstrate the self-healing workflow.
- Containerizing frontend, backend, and ML services using Docker and implemented CI/CD workflows with GitHub Actions to automate testing, image builds, and Kubernetes deployments.

MasteryHub - Online Course Platform | *MERN Stack, Redux Toolkit* — Oct 2024 – Dec 2024

- Developed a full-stack web application using the MERN stack, providing separate student and instructor functionalities.
- Implemented user authentication, role-based access control, course management, and CRUD operations using Node.js, Express.js, and MongoDB.
- Developed responsive React.js interfaces and integrated RESTful APIs for frontend-backend communication, using Redux Toolkit for centralized state management.
- Integrated third-party services including Cloudinary for cloud-based media storage, Nodemailer for email notifications, and PostHog for application analytics; used Postman for API testing and Git/GitHub for version control.
- Deployed the MERN stack application to cloud hosting platforms, configured production environment variables and database connectivity, and validated frontend-backend integration in the production environment.

Technical Skills

Programming Languages: C++, JavaScript, TypeScript, SQL
Frontend Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS
Backend Development: Node.js, Express.js, RESTful APIs
Databases: MongoDB, MySQL
Libraries & State Management: Redux Toolkit, React Router, Axios
Developer Tools: Git, GitHub, Postman, VS Code
Third-Party Integrations: Cloudinary, Nodemailer, PostHog
Core Concepts: OOP, DBMS, CRUD Operations, Authentication, Role-Based Access Control, API Integration
